

Drs Esly & Sandy Fuentes. Although Esly was born into this ministry he and Sandy both officially joined WWHO as staff in 2011. They immediately opened the clinic and pharmacy in Biznaga and later in 2011 opened the San Antonio clinic and in the spring of 2012 the pharmacy. Seeing the need in the village of Mesa de las Tablas they opened the clinic and pharmacy there in the spring of 2013.

Esly and Sandy met while in Medical school in Cuba and after graduating and moving to Mexico, they got married in December 2011. Sandy is originally from Bolivia.

Esly wanted to go into medicine because he believed that a medical doctor could reach people who did not know Jesus through a medical ministry. Sandy wanted to go into medicine because she wanted to help her community, her family, and be an example to her brothers and sisters to encourage them to continue studying.

They chose to join WWHO and develop the medical ministry because WWHO had established themselves in a ministry area that needed to be served, in a location that was already equipped and ready to be used, it just needed doctors to start this vital ministry.

In 2017 WWHO's Board of Directors offered the position of Executive Director of WWHO to Dr. Esly, and the position of Manager of Medical Ministry to Dr. Sandy. Both are still practicing physicians in the medical ministry, but have taken on those administrative roles as well to help expand WWHO overall ministry.

Anniversary	December 16
Esly birthday	September 5
Sandy birthday	June 16
